Saudi Commission for Health Specialties Available *e-Library* Databases

PubMed Central is a digital database of full-text scientific literature in biomedical and life sciences. PubMed Central is provided by the U.S. National Library of Medicine as an online archive of biomedical journal articles. This service allows rapid searching and text/data mining, and makes it easy to link literature to databases of various publishers.

Ovid Core BioMedical Medical Collection provides access to Ovid Core Biomedical Journal Collection (a current journal collection containing 13 of the world's top cited medical journals in one convenient package), as well as back issues to hundreds of other Ovid titles. OVID Collection also includes access to **Evidence-Based Medicine Reviews (EBMR)** that helps clinicians practice EBM through a combination of resources that provide systematic reviews of topics; article reviews; and access to definitive controlled trials

Clinical Key is a medical search engine and database that contains content from several current Elsevier databases including MD Consult, First Consult, Procedures Consult, Clinics of North America and new content including nearly 900 e-books. The service aims to provide a comprehensive, trusted and fast source of clinical answers in a new approach through aggregated content services rather than the traditional model of journals and textbooks.

Access Medicine from McGraw-Hill is an online collection of key medical reference texts that provide users with fast, direct access to the information necessary for completing evaluations, diagnoses, and case management decisions, as well as for pursuing research, medical education, or self-assessment and board review. Searching is available across the entire suite of basic sciences and clinical texts. An A-Z index and QuickAccess search also provide easy access to material.

eMedicine of Medscape is the authoritative point of care medical reference available to physicians and other healthcare professionals on the internet. The evidence-based content, updated regularly by more than 8,000 attributed physician or healthcare provider authors and editors, provides the latest practice guidelines in 38 clinical areas. The eMedicine Clinical Knowledge Base contains articles on over 6,500 diseases and medical topics, and is richly illustrated with some 28,000 multimedia files.

Dentistry & Oral Sciences Sources From EBSCO contains cover-to-cover indexing and abstracts for more than 230 journals and dozens of monographs - dentistry and oral sciences journals. It is also a good source for dental practitioners and researchers who can start and finish their online dental literature research.

Mosby's Nursing Consult from Elsevier brings the leading resources together in one integrated online service to help nurses efficiently find answers to pressing clinical questions. It also offers authoritative information to help provide better patient care: find answers quickly, educate patients, stay informed of new developments in nursing and improve the quality of patient care.

American Academy of Pediatrics (AAP) Journals are clinical publications in the field of pediatrics - scientific journals, continuing education periodicals, a membership news magazine and manuals on topics such as infectious diseases and school health. This core journal collection in pediatrics brings to the SCFHS eLibrary users premier titles including Pediatrics, Pediatrics in Review, NeoReviews, AAP Grand Round, and AAP NEWS.

American Academy of Pediatrics (AAP) RedBook is a major reference from the APP that provides quick answers to improve diagnosis and treatment at the point-of-care. It is one of the clinical resources for the busy pediatric professional. It also provides most reliable and clinically relevant information on more than 200 childhood infectious diseases with 2,500 full color images and up-to-date clinical guidelines."

The Psychiatry Online Premium collection from the American Psychiatry Association allows users to access a rich, well-rounded core psychology and psychiatry journals, books, and references. This comprehensive collection covers diagnosis and differential diagnosis, case vignettes to bring abstract concepts to life, multidisciplinary treatment guidelines, the latest research - all within a single search and navigation interface that integrates journals and books

Lexi-Comp Online is an internet-based platform delivering trusted drug and clinical information. This resource offers multiple databases and an easy-to-use interface. Content is continually updated, providing access to the most current drug information available.

UpToDate* is a full-text evidence-based/point resource that provides clinical information in many specialties to assist medical professionals in recognizing the clinical manifestations of a wide variety of disorders. The database topics describe current options for diagnosis, management and therapy, including the efficacy, doses, and interactions of individual drugs, as well as identify optimal screening and prevention strategies. The topics are illustrated and referenced as well as include links to other related topics, drug information, and Medline abstracts for references cited.
