

SAUDI BOARD RESIDENCY TRAINING PROGRAM

Diagnostic Radiology

Promotion Examination

Written Examination Format:

- A written examination consists of 25 questions, the exam for first, second and third year resident each level as SAQ (short assay questions).
- The examination contains type K2 questions (interpretation, analysis, reasoning and decision making) and type K1 questions (recall and comprehension).
- The examination includes basic concepts and clinical topics relevant to the specialty.
- Anatomy questions; include the normal anatomy, mark-lines and normal variants. Materials and Technical questions; including material properties, usage, and selection of instruments and equipment used as well as the technical errors & artefacts. Health maintenance questions; include health promotion, disease prevention, risk factors assessment, and prognosis. Diagnosis and investigation questions; include the possible diagnosis and diagnostic methods. Management questions; including clinical management, either therapeutic or non-therapeutic.

Passing Score for Promotion Exam:

The trainee's performance is assessed in each of the evaluation formulas according to the following scoring system:

Score	Less than 50%	50% – 59.4%	60% - 69.4%	More than 70%
Description	Clear Fail	Borderline Fail	Borderline Pass	Clear Pass

1. To upgrade the trainee from a training level to the next level, She/he must obtain at least a **Borderline Pass** in each evaluation form.
2. The program director may recommend to the local supervision committee to request the promotion of the trainee who did not meet the previous promotion requirement according to the following:
 - A. In case that the trainee gets a **borderline Fail** result in **one** of the evaluation forms, the remaining evaluation forms must be passed with **Clear Pass** in at least **one** of them.
 - B. In case that the trainee gets a **borderline Fail** result in **two** of the evaluation forms to a maximum, provided they do not fall under the same theme (Knowledge, Attitude, Skills). The remaining evaluation forms must be passed with **Clear Pass** in at least **two** of them.
 - C. The promotion must be approved in this case by the scientific council for the specialization.

Blueprint Outlines

R1

TOTAL ITEMS: 25 SAQ

No.	Sections	Total Percentage	Total Required Items	Domains		
				Anatomy	Technique	Pathology
1	Musculoskeletal	16%	4	0	0	4
2	Neuroradiology	12%	3	0	0	3
3	Head and neck and spine	4%	1	0	0	1
4	Cardiothoracic	12%	3	0	0	3
5	Gastrointestinal	8%	2	0	0	2
6	Genitourinary	8%	2	0	0	2
7	Vascular & Interventional	0%	0	0	0	0
8	Pediatrics	0%	0	0	0	0
9	Nuclear Medicine	4%	1	0	0	1

Example Questions

EXAMPLE OF K2 QUESTIONS

Question 1

Mention 4 findings in a 45-year-old patient with epilepsy (see image)?

.....

EXAMPLE OF K1 QUESTIONS

Question 2

Which of the following is the main abnormality (see image)?

- A. There is mass at left cerebral hemisphere
- B. There is diffuse hypodensity at left MCA territory
- C. The primary lesion is diffuse hypodensity at left insula
- D. There is mass lesion with infiltration of forceps major
